- 2.05pm **Accelerating renewable energy and energy efficiency**
The Ministry of Business, Innovation & Employment recently released a discussion paper covering two areas of the Government’s Renewable Energy Strategy work programme - accelerating renewable electricity and lowering emissions from process heat. MBIE is now seeking feedback on both the sequencing and the optimal package of policies outlined in the document, taking into account related Government work as it progresses. This presentation provides an opportunity to hear about the policy development process and ask any questions that may help market participants draft their submissions.
